Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 29-35 and 46-93 are pending in the instant application.

Acknowledgement is made of Applicant's Request for Continued Examination filed 4/8/02. Claims 53-65 are withdrawn from further consideration, as stated in the Office Action mailed 3/13/01, as being drawn to non-elected invention.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 29-35, 46-51, and 66-85 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification teaches the use of paclitaxel, Capxol, and Taxol, but does not state the use of "Taxanes" in the instant invention. Whereas Applicant has asserted that the specification at page 22, line 12 teaches such limitation, the examiner was not able to locate such teaching. The examiner notes that the specification is a copy of WO 99/00113.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 1616

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 29-35 and 46-93 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6, 17-18, 31-36 of U.S. Patent No. 6,096,331. Although the conflicting claims are not identical, they are not patentably distinct from each other because Patent **331 is drawn to a method of administering taxane in the range from 30 mg/m² over an administration time of less than 3 hours, as well as a formulation of taxane for the treatment of primary tumors. The claims of **331 are not drawn to administration using medical hardware, but the specification teaches the formulation is injected (see example 3). Further, the specification teaches, in the formulation, the size of the particles in the colloidal suspension can be from 20 nm to 8 microns (col. 6, lines 7-9).

Response to Arguments

4. Applicant's arguments with respect to claims 29-34, 46-51, 66-93 have been considered but are moot in view of the new ground(s) of rejection.
